

## TG05.4 - Site Logistics Traffic Control

Questions are numbered in the order received.

Question Number	Question	Response
TG05.4-0001	Does a submitting JV need its own insurance meeting the requirements stated in the RFP, or is the specified coverage being met by the partner firms making up the JV sufficient for the General Contract/Selection Panel?	Yes, if contracting as a joint venture, the joint venture must be a legal entity with its own insurance.
TG05.4-0002	What is the Agency's Definition of a Joint Venture and what agreements need to be in place if firms want to submit their proposal as a Joint Venture?	<p>The CM/GC defines a joint venture as provided in California Business and Professions Code section 7029, et seq. Any respondent joint venture must be properly licensed as a single entity and must submit with its Qualification Statement a copy of the joint venture agreement.</p> <p>The agreement shall identify the responsibilities of each partner in the joint venture for the scope of work established by the RFP, demonstrate the relationship between partners, and provide for contractual relationships and authorities to bind each entity to the obligations of the joint venture. The joint venture respondent should submit experience and qualifications as an entity and should submit experience and qualifications for each joint venture partner.</p>
TG05.4-0003	In the Traffic Control Specification 01570-2F # 10 "TEMPORARY PAVEMENT" is Temporary Pavement in regards to traffic controls limited to the following: A. Pothole Patching; B. "Cutback or Coldpatch" at bridging and plating, handicap ramps, and sidewalk repairs; C. Misc Roadway Maintenance; D. Does not include Roadway Grinding or Hot Asphalt Application.	<p>Section 01 15 70, paragraph 1.2.F.10 defines "temporary pavement" as part of the scope for Traffic Routing Work. The requirement for "temporary pavement" is to accommodate construction traffic control and maintenance of public and construction safety throughout the complete construction duration. It is envisaged that the scope may include <u>pothole patching; "cutback or coldpatch" at bridging and plating, handicap ramps, and sidewalk repairs; and misc. roadway maintenance</u>. Usually, roadway grinding and hot asphalt application, which are typically utilized for larger paving areas, and possibly permanent installations, will not be necessitated by "temporary pavement" work. However, without the opportunity to review the traffic control plan as stipulated in 1.2.A of the same section, we cannot preclude the need at this time.</p>
TG05.4-0004	Will there be a preference for teams led by a Contractor versus a Professional Services Company?	No preference, as long as the entity possesses the required licensing.
TG05.4-0005	The proposal checklist (attachment 2) includes "CityBuild/FirstSource Referral Program Certificate" but section 00 04 57 includes no Certification form. What should submitters included in their proposal to satisfy this checklist requirement?	<p>Section 00 04 57 does not include a certification form; however, the following is stated at the end of the specification section, "The above Certification is part of the Bid. Signing the Bid form shall also constitute signature of this Certification." Submitters' inclusion of the signed Bid Form therefore satisfies the requirements of the checklist.</p>

<b>Question Number</b>	<b>Question</b>	<b>Response</b>
TG05.4-0006	In reference to section 01-15-50-6, is the GC committed to the specs laid out for the changeable warning signs or can an alternate sign model be used, so long as it meets/exceeds the capabilities of the model specified?	In accordance with Section 01 15 70 (paragraph 2.4), "Contractor may supply any other model of any other manufacturer meeting these requirements."
TG05.4-0007	The proposal checklist states the submissions must include the item "Subcontractor List (SL)" but there is no "subcontractor list" in the package - does the checklist actually refer to the "Subcontracting Request (SR)" included on page 45 of the proposal manual?	The "Subcontractor List" (SL) requirement in Exhibit A is a misprint. Use the "Subcontracting Request" (SR) form as noted in the Proposal Manual.
TG05.4-0008	Has an overall budget for the Traffic Control Plan development and execution been established or is that TBD?	No budget has been established for this RFP.
TG05.4-0009	The proposal checklist in Attachment 2 specifies "NonDiscrimination in Contracts and Benefits (section 00 04 70)" but the only mention of this section is in the Specifications' table of contents where the title and information are struck through/crossed out. What do the submitters need to include in proposals to satisfy the checklist requirement?	Section 00 04 70 has been deleted from the contract specifications. The applicable form is contained in Section 00 08 13/APA.
