

Transbay Transit Center

Construction Update

10 DAY LOOK AHEAD: Transbay Construction Activities

Thursday, November 24, 2011 – Sunday, December 4, 2011

Happy Thanksgiving!

The Transbay Joint Powers Authority would like to wish everyone a safe and happy Thanksgiving Holiday.

This week at Transbay...

Thanksgiving Holiday Weekend Work (11/24/11 – 11/27/11):

No heavy work is scheduled to take place during Thanksgiving weekend. Maintenance work will take place within the site.

Eastern Transit Center Site (Between Beale and Fremont Streets): Only buttress equipment and maintenance activity is expected to continue in the eastern transit center site from Friday, November 25 through Sunday, November 27 between 6:00 AM and 10:00 PM.

Weekday Work (11/28/11 – 12/2/11):

Night Shift - The buttress wall installation operation will continue in the eastern transit center site between Beale and Fremont Streets between the hours of 6:00 AM and 1:00 AM. There will be minimal work on site between 1:00 AM and 6:00 AM. If there is a problem, work on site could extend into the hours between 1:00 AM and 5:00 AM but we will make every effort to mitigate this possibility.

Day Shift - All contractors will work between the hours of 7:00 AM and 7:00 PM, except as otherwise noted below. Activities will include:

Buttress, Shoring & Excavation Work:

Buttress Wall: Installation of the buttress wall will continue in the eastern transit center site inside the construction fence between the hours of 6:00 AM and 1:00 AM.

Shoring Wall: Cement Deep Soil Mixing (CDSM) work is completed until early February 2012.

Excavation Work: Excavation for the new Transit Center Building (including demolition of underground structures) will continue through the end of 2014. The excavation will move from the west transit center site and continue to the east end. The contractor will be excavating to an average depth of about 60 to 65 feet. NOTE: While most excavation work will take place during the day shift, excavation, like the buttress work, will become a 24 hour activity.

Construction Update

Crushed concrete and spoils will be removed from the western transit center site exiting onto Howard Street from a construction gate located near 564 Howard – Day Shift.

Underground Utilities/Trenching:

First Street (Between Mission and Howard Streets): Underground utilities work continues on First Street – Day Shift.

Mission Street (Between Fremont and Main Street): Potholing for future AWSS work continues on Mission Street – Day Shift

What to Expect Next Weekend (12/3/11 – 12/4/11):

Eastern Transit Center Site (Between Beale and Fremont Streets): Buttress preparation and construction activity is expected to continue in the eastern transit center site on Saturday, December 3 and Sunday, December 4 between 6:00 AM and 1:00 AM. Depending on progress in the coming week, the hours of operation and level of activity may be reduced.

First Street (Between Mission and Howard Streets): Underground utilities work continues on First Street on Saturday, December 3.

Detours, Street and Sidewalk Closures:

The following streets will be temporarily impacted due to project activities. So you can plan ahead, please review the affected streets below:

First Street (Between Mission and Howard Streets): Utility work will take place along First Street. Lane restrictions will be in effect from 7:00 AM to 3:00 PM. SFPD will be on site.

Fremont Street (Between Mission and Howard Streets): The east sidewalk of Fremont Street between Mission and Howard Streets will remain closed. Pedestrians are directed to the sidewalk on the west side of Fremont Street.

Natoma Street (Between First and Second Streets): Natoma Street has been changed to a dead end street for the life of the project. Local access to 500 Howard Street is available to and from First Street. Local pedestrian access from Second Street to businesses on Natoma Street will remain available.

Natoma Street (Between Fremont and First Streets): Natoma Street has been reduced to one lane, one way (west bound), all vehicles will enter from Fremont Street and exit at First Street for the life of the project.

PG&E is performing repaving work at the Beale and Mission Street intersection, with additional repaving night work being performed along Beale Street between Market and Mission Streets. This work is scheduled to take place through December 2 and is not under the control or authority of the TJPA. If you have any questions surrounding this work please contact PG&E representative Michael Riordan at (415) 973-6201.

Transbay Transit Center

Construction Update

Transbay Archeology Exhibit Opening

As the construction of the Transbay Transit Center moves ahead, we would like to share with our project neighbors and Bay Area residents some of the amazing artifacts that we have found along the way.

This exhibit will feature a variety of items discovered within the footprint of the project site that illuminate the rich history of San Francisco's gold rush era. Recovered artifacts show the way residents of the South of Market neighborhood in the 19th century lived, worked and played, including industrial tools, household items and remnants of neighborhood businesses.

Opening:

Friday, December 2, 2011

Time: 9 AM – 5 PM

201 Mission Street lobby

San Francisco, CA 94105

Questions?

Should you have any general questions about the Transbay Transit Center Project, please call Adam Alberti or Stephanie Reichin, Transbay Outreach Team, at: (415) 227-9700 or via e-mail at: info@transbaycenter.org

Construction Hotline:

If you have any urgent questions regarding site-specific demolition or construction activities, please call our construction activity number: (415) 409-TJPA (8572).
