

Transbay Transit Center

Construction Update

10 DAY LOOK AHEAD: Transbay Construction Activities

Friday, December 9, 2011 – Sunday, December 18, 2011

THIS WEEK AT TRANSBAY...

Weekend Work (12/10/11 – 12/11/11):

Day Shift - All contractors will work between the hours of 7:00 AM and 7:00 PM. Activities will include:

Eastern Transit Center Site (Between Beale and Fremont Streets): The buttress wall installation operation is expected to continue in the eastern transit center site on Saturday, December 10. On Sunday, December 11 the hours of operation and level of activity will be reduced – Day Shift.

Weekday Work (12/12/11 – 12/16/11):

Night Shift - The buttress wall installation operation will continue in the eastern transit center site between Beale and Fremont Streets between the hours of 6:00 AM and 1:00 AM. There will be minimal work on site between 1:00 AM and 6:00 AM. If there is a problem, work on site could extend into the hours between 1:00 AM and 5:00 AM.

Day Shift - All contractors will work between the hours of 7:00 AM and 7:00 PM, except as otherwise noted below. Activities will include:

Buttress, Shoring & Excavation Work:

Buttress Wall: Installation of the buttress wall will continue in the eastern transit center site inside the construction fence between the hours of 6:00 AM and 1:00 AM.

Excavation Work: Excavation for the new Transit Center Building (including demolition of underground structures) will continue through the end of 2014. The excavation will move from the west transit center site and continue to the east end. The contractor will be excavating to an average depth of about 60 to 65 feet. NOTE: While most excavation work will take place during the day shift to begin, excavation, like the Buttress work, will become a 24 hour activity.

Crushed concrete and spoils will be removed from the western transit center site exiting onto Howard Street from a construction gate located near 564 Howard Street – Day Shift.

Underground Utilities/Trenching:

First Street (Between Mission and Howard Streets): Underground utilities work continues on First Street – Day Shift.

What to Expect Next Weekend (12/17/11 – 12/18/11):

Eastern Transit Center Site (Between Beale and Fremont Streets): The buttress wall installation operation is expected to continue in the eastern transit center site on Saturday, December 17. On Sunday, December 18 the hours of operation and level of activity will be reduced – Day Shift.

Construction Update

Detours, Street and Sidewalk Closures:

The following streets will be temporarily impacted due to project activities. So you can plan ahead, please review the affected streets below:

First Street (Between Mission and Howard Streets): Utility work continues through Wednesday, December 21 along First Street. Traffic Lane restrictions will be in effect from 7:00 AM to 3:00 PM. SFPD will be on site to assist.

Fremont Street (Between Mission and Howard Streets): The east sidewalk of Fremont Street between Mission and Howard Streets remains closed. Pedestrians are directed to the sidewalk on the west side of Fremont Street.

Trenching will begin on the Fremont Street west sidewalk on Tuesday, December 13 through Wednesday, December 14. Pedestrians may be diverted into the parking lane during this work.

Natoma Street (Between Fremont and First Streets): Natoma Street will be closed at First Street as street and sidewalk restoration continues through Wednesday, December 21. Local access to and from 400 Howard Street is available from Fremont Street through Friday, December 16. Natoma Street will then be closed at Fremont Street on Saturday, December 17 with all vehicles entering and exiting from First Street through Wednesday, December 21.

Natoma Street (Between First and Second Streets): Natoma Street has been changed to a dead end street for the life of the project with no vehicle access to Natoma Street from Second Street. Local access to 500 Howard Street is available to and from First Street. Local pedestrian access from Second Street to businesses on Natoma Street will remain available.

Minna Street (Between First and Second Streets): Minna Street has been reduced to one lane, one way (west bound), all vehicles will enter from First Street or Shaw Alley. There will be no parking along Minna Street between First Street and 130 feet east of Second Street for the life of the project.

Transbay Archeology Exhibit

As the construction of the Transbay Transit Center moves ahead, we would like to share with our project neighbors and Bay Area residents some of the amazing artifacts that we have found along the way.

This exhibit features a variety of items discovered within the footprint of the project site that illuminates the rich history of San Francisco's gold rush era. Recovered artifacts show the way residents of the South of Market neighborhood in the 19th century lived, worked and played, including industrial tools, household items and remnants of neighborhood businesses.

Open: Weekdays, 9:00 AM – 5:00 PM

201 Mission Street lobby

San Francisco, CA 94105
